

Session 15 Assignment Problems - Establishing a Class and Instantiating an Object

For assignment 1, first recreate this class and code to instantiate and use the employee object as explained in this video.

Then modify the object to receive a bonus rate. Add a method that computes and returns the bonus amount (salary x bonus rate) and the total compensation (salary + bonus amount).

Watch video

Input	Process	Output
	Receive Bonus Rate	Employee/Developer Email, Salary, Bonus Amount, Total Compensation
	Returns Bonus Amount (Salary * Bonus Rate)	
	Total Compensation (Salary + Bonus Amount).
